

Amine SGHIR

Senior AI/LLM Engineer • Tech Lead • Freelance

Paris, France • sghir.ma@gmail.com • +33 6 95 70 26 00 • linkedin.com/in/amine-sghir-29b598101 • github.com/pitchopp • pitchop.com

Summary

10+ years of experience in Python, data engineering and cloud, specialized in **generative AI in production** (agents, RAG, LLM-as-judge). Tech Lead on Sodexo's GenAI platform (*Pegasus*) — from-scratch redesign away from Azure Machine Learning Studio toward a maintainable stack. Track record in large energy & banking enterprises (ENGIE, Crédit Agricole, EDF, TotalEnergies) and as **founder of 3 operational SaaS** (Locary, Take My Keys, Judia). Available immediately — **remote FR/EU/International** or hybrid (max 2 days on-site/week).

Skills

- **GenAI / LLM** — Azure OpenAI (GPT-5, GPT-4o), Claude, Gemini, LangChain, agents, prompting, LLM-as-judge, fine-tuning
- **Python & Backend** — Python (10 years), Django, FastAPI, Flask, Celery, Redis, REST APIs
- **Data & ML** — Scikit-learn, Pandas, NumPy, PySpark, Kafka, Dataiku, ETL, TimeSeries
- **Cloud, DevOps & Obs.** — Azure (OpenAI, ML, DevOps, Entra), AWS (S3, Lambda, Glue), Docker, Azure Pipelines, GitHub Actions, Terraform, OpenTelemetry, Datadog, Grafana
- **Frontend** — Next.js, React, TypeScript, Tailwind CSS, Node.js

Experience

Tech Lead & AI Engineer — Sodexo (Pegasus project) • Freelance • 06/2025 — present

- **From-scratch redesign** within Sodexo's global Data Factory (Supply Chain): migration from an Azure Machine Learning Studio (AMLS) workflow toward a **UI + REST API + async workers** architecture; multi-step pipeline (extraction, grounding, comparison) over multi-language supplier documents (PDF, images).
- **LLM evaluation in production**: retry + voting, deviation filtering, per-attribute confidence score, **LLM-as-judge** + precision metrics.
- *Python • Azure OpenAI (GPT-5/4o) • LangChain • Django • Celery • Redis • PostgreSQL • Next.js • Docker • Azure Pipelines • OpenTelemetry • Datadog*

Senior Data Engineer — ENGIE GEMS (Energy trading) • Freelance • 01/2023 — 05/2025

- **Cloud data pipelines** (Azure, AWS) with CI/CD for market analysts and traders; **end-to-end time series management tool** (scrapers → processing → catalog + advanced formula system).
- **Internal Python libraries** published via Artifactory (docs + rigorous tests), adopted by multiple teams.
- *Python • Azure • AWS • Azure DevOps • CI/CD • Artifactory • TimeSeries*

Senior AI & Backend Engineer — Klaimy (Insurtech AI) • Freelance • 01/2025 — 05/2025

- **From-scratch customer web app and API** for automated insurance case management (underwriting, claims).
- **AI queue system** for asynchronous LLM processing; integration of ML models with the Data Science team.
- *Python • Django • Next.js • Celery • Docker • Azure • OpenAI • Claude • Gemini • Custom GPTs*

Tech Lead / Data Engineer — ENGIE (MASTERMIND project) • CDI Visian • 06/2020 — 07/2022

- **Serverless ETL** on AWS (S3, Glue, Lambda) + **C3.ai** for optimizing residential energy consumption (Linky / Gazpar smart meters); APIs + MapReduce jobs + ML models; prod supervision (Splunk, Grafana); dev mentoring; SAFe Agile.
- *Python • AWS • C3.ai • PySpark • Cassandra • PostgreSQL • Splunk • Grafana • Jenkins*

In parallel since 04/2021 — Python & Data Mentor at OpenClassrooms (long-term mentoring of Python Developer / Data Analyst students).

Entrepreneurial projects

Locary (founder, 2024) *locary.fr* — Real-estate rental management SaaS + AI • **Take My Keys** (CTO co-founder, 2023) *takemykeys.fr* — Concierge & rental management platform • **Judia** (founder, 2024) *judia.pitchop.com* — AI email assistant.

Education, certifications & languages

Engineering degree École Centrale de Lille (2014–2017), spec. E-business & IoT • CPGE MPSI/MP* Lycée Michel Montaigne, Bordeaux. **Certifications**: AWS Solutions Architect, Certified ScrumMaster, ML (Columbia), Hadoop/Spark, Project Management. **Languages**: French/Arabic (native) • English (fluent — TOEIC 895) • German (basic).
