

Amine SGHIR

Senior Data Engineer • Tech Lead • Freelance

Paris, France • sghir.ma@gmail.com • +33 6 95 70 26 00 • linkedin.com/in/amine-sghir-29b598101 • github.com/pitchopp • pitchop.com

Summary

10+ years of experience in Python, cloud (Azure/AWS) and large-scale data pipelines. Specialized in **time series**, **serverless ETL** and **internal data platforms** (ENGIE x2, Crédit Agricole, EDF, TotalEnergies, Lyxor). Dual track-record as **AI/LLM Tech Lead** (Sodexo, Klaimy) and **founder of 3 SaaS**. Available immediately — **remote FR/EU/International** or hybrid (max 2 days on-site/week).

Skills

- **Data Engineering** — ETL pipelines, TimeSeries, Kafka, Spark, PySpark, Pandas, Dataiku, Artifactory, MapReduce
- **Python & Backend** — Python (10 years), Django, FastAPI, Flask, Celery, Redis, REST APIs
- **Cloud, DevOps & Obs.** — Azure (DevOps, ML, Databricks), AWS (S3, Lambda, Glue), C3.ai, Docker, Azure Pipelines, GitHub Actions, Terraform, OpenTelemetry, Datadog, Grafana, Splunk
- **Databases** — PostgreSQL, Cassandra, MS SQL Server, MySQL
- **ML & GenAI** — Scikit-learn, text mining, clustering, LangChain, Azure OpenAI (GPT-5/4o), Claude

Experience

Senior Data Engineer — ENGIE GEMS (Energy trading) • Freelance • 01/2023 — 05/2025

- **Cloud data pipelines** (Azure, AWS) with CI/CD for market analysts and traders: gas/electricity prices (spot, forward, short-term), weather, cross-country liquid gas flows.
- **End-to-end time series management tool**: scrapers → processing → catalog + advanced formula system.
- **Internal Python libraries** published via Artifactory (docs + rigorous tests), adopted by multiple teams.
- *Python • Azure • AWS • Azure DevOps • CI/CD • Artifactory • TimeSeries*

Tech Lead / Data Engineer — ENGIE (MASTERMIND project) • CDI Visian • 06/2020 — 07/2022

- **Serverless ETL** AWS (S3, Glue, Lambda) + **C3.ai** to centralize Linky/Gazpar smart-meter data (team of 11, SAFe Agile).
- APIs + MapReduce jobs + ML models; prod supervision (Splunk, Grafana); dev mentoring.
- *Python • AWS • C3.ai • PySpark • Cassandra • PostgreSQL • Splunk • Grafana • Jenkins*

Tech Lead & AI Engineer — Sodexo (Pegasus project) • Freelance • 06/2025 — present

- **Sole Tech Lead** of the Pegasus platform (global Data Factory): batch LLM extraction pipeline on multi-language supplier documents. From-scratch redesign (UI + REST API + Celery workers + PostgreSQL).
- LLM evaluation in production (retry/voting, confidence, LLM-as-judge); observability via OpenTelemetry + Datadog.
- *Python • Azure OpenAI • LangChain • Django • Celery • PostgreSQL • Docker • Azure Pipelines*

Data Engineer / Analyst / Data Scientist — Lyxor Asset Management • CDI Visian • 12/2017 — 06/2019

- **Single master repository** for financial data (transactions, clients, products); **automated AMF regulatory reporting**; portfolio reconciliation; Tableau dashboards; text mining / clustering / classification of clients.
- *Python • Pandas • Scikit-learn • Tableau*

In parallel since 04/2021 — Python & Data Mentor at OpenClassrooms (50+ Python Developer / Data Analyst students).

Entrepreneurial projects

Locary (founder, 2024) *locary.fr* — Real-estate rental SaaS + AI • **Take My Keys** (CTO co-founder, 2023) *takemykeys.fr* — concierge & rental management • **Judia** (founder, 2024) *judia.pitchop.com* — AI email assistant.

Education, certifications & languages

Engineering degree École Centrale de Lille (2014–2017), spec. E-business & IoT • CPGE MPSI/MP* Lycée Michel Montaigne, Bordeaux. **Certifications**: AWS Solutions Architect, Certified ScrumMaster, ML (Columbia), Hadoop/Spark, Project Management. **Languages**: French/Arabic (native) • English (fluent — TOEIC 895) • German (basic).
