

Amine SGHIR

Senior Data Engineer • Tech Lead • Freelance

Paris, France • sghir.ma@gmail.com • +33 6 95 70 26 00

linkedin.com/in/amine-sghir-29b598101 • github.com/pitchopp • pitchop.com

Summary

Senior Data Engineer with **10+ years of experience** in Python, cloud (Azure / AWS), and large-scale data pipelines. Specialized in **time series**, **serverless ETL** and **internal data platforms** for large enterprises (ENGIE x2, Crédit Agricole, EDF, TotalEnergies, Lyxor). Dual track-record as **AI/LLM Tech Lead** (Sodexo, Klaimy) and **founder of 3 SaaS products**. Available immediately — **remote FR/EU/International** or hybrid (max 2 days on-site/week).

Skills

- **Data Engineering** — ETL pipelines, TimeSeries, Kafka, Spark, PySpark, Pandas, NumPy, Dataiku, Artifactory, MapReduce
- **Python & Backend** — Python (10 years), Django, FastAPI, Flask, Celery, Redis, REST APIs, Pytest
- **Cloud** — Azure (DevOps, ML, Databricks, OpenAI, Entra), AWS (S3, Lambda, Glue), C3.ai
- **DevOps & CI/CD** — Docker, Azure Pipelines, GitHub Actions, GitLab CI, Jenkins, Terraform, Ansible
- **Databases** — PostgreSQL, Cassandra, MS SQL Server, MySQL, CouchBase
- **Observability** — Application Insights, OpenTelemetry, Datadog, Grafana, Splunk, ELK
- **ML & GenAI** — Scikit-learn, text mining, clustering, LangChain, Azure OpenAI (GPT-5, GPT-4o), Claude, Gemini, LLM-as-judge

Professional experience

Senior Data Engineer — ENGIE GEMS (Energy trading) • Freelance • 01/2023 — 05/2025

ENGIE GEMS buys and sells energy on the markets. Analysts and traders rely on a large catalog of time series — gas and electricity prices (spot, forward, short-term), weather, liquid gas flows between countries, and many other market signals — for their analyses and trading decisions.

- **Cloud data pipelines** (Azure, AWS) with CI/CD: collection, processing, storage and delivery to business teams.
- **End-to-end time series management tool**: scrapers → processing → storage → catalog + **advanced formula system** to combine and derive series.
- **Internal Python libraries** published via Artifactory (documentation + rigorous tests), adopted by multiple teams.
- *Python • Azure • AWS • Azure DevOps • CI/CD • Artifactory • TimeSeries*

Tech Lead / Data Engineer — ENGIE (MASTERMIND project) • CDI Visian • 06/2020 — 07/2022

MASTERMIND project (team of 11, SAFe Agile): enabling ENGIE's residential customers to track and reduce their energy consumption by centralizing data from Linky (electricity) and Gazpar (gas) smart meters.

- **Serverless ETL architecture** on AWS (S3, Glue, Lambda) and **C3.ai** platform for large-scale Linky/Gazpar ingestion.
- **APIs + MapReduce jobs** + ML models; production supervision (Splunk, Grafana); incident handling; developer mentoring.
- *Python • AWS Lambda/S3/Glue • C3.ai • PySpark • Pandas • Cassandra • PostgreSQL • Docker • Splunk • Grafana • MapReduce • Scikit-learn • Jenkins • Pytest*

Tech Lead & AI Engineer — Sodexo (Pegasus project) • Freelance • 06/2025 — present

Pegasus automates the enrichment of Sodexo's product catalog (food, services, equipment) from multi-language supplier documents (PDF, datasheets, images).

Sole Tech Lead of the project within the global Data Factory.

- **From-scratch architecture**: UI + REST API + async workers + **PostgreSQL**, abandoning a legacy Azure Machine Learning Studio (AMLs) workflow.
- **Multi-step batch pipeline** with retry, voting, scoring, comparison to a reference dataset — observability via OpenTelemetry / Datadog.
- *Python • Azure OpenAI • LangChain • Django • Celery • Redis • PostgreSQL • Next.js • Docker • Azure Pipelines • OpenTelemetry • Datadog*

Data Engineer / Analyst / Data Scientist — Lyxor Asset Management · CDI Visian · 12/2017 — 06/2019

Lyxor (asset management): rebuilding a single master repository for financial data (transactions, clients, products) scattered across multiple non-reconciled information systems, and industrializing regulatory AMF reporting.

- **Triple hat — Data Eng / Analyst / Science:** deployment architecture, **automated AMF reporting**, quality alerts; client position reconciliation, portfolio harmonization, **Tableau** dashboards; text mining, clustering, classification of clients and funds.
- *Python · Pandas · Scikit-learn · REST APIs · Tableau · Google Analytics*

Senior AI & Backend Engineer — Klaimy (Insurtech AI) · Freelance · 01/2025 — 05/2025

Klaimy automates insurance processes through AI (policy underwriting, claims declaration and instruction) for brokers and insurance companies.

- From-scratch customer web app and API; **asynchronous queue system** for ML/LLM processing; integration of predictive models.
- *Python · Django · Next.js · React · Celery · Docker · Azure · OpenAI · Claude · Gemini*

Python & Data Mentor — OpenClassrooms · Independent · 04/2021 — present

Long-term mentoring of students (Python Developer, Data Analyst tracks), assessment of deliverables and validation of final defenses. **50+** students past and current.

Entrepreneurial projects

- **Locary** (*founder, since 2024*) — *locary.fr* — Real-estate rental management SaaS with automation and AI: bank synchronization, receipt generation, automated reminders.
- **Take My Keys** (*CTO & co-founder, since 2023*) — *takemykeys.fr* — Concierge and rental management platform.
- **Judia** (*founder, 2024*) — *judia.pitchop.com* — AI email assistant.
- **Open source:** `django-nextjs-tw-boilerplate` (published template, GitHub).

Education

- **Engineering degree (MSc)** — École Centrale de Lille (2014–2017), specialization **E-business & IoT**.
- **CPGE MPSI / MP*** — Lycée Michel Montaigne, Bordeaux (2012–2014), Mathematics.
- **TOEIC:** 895 (April 2017).

Certifications

- **AWS Certified Solutions Architect** — AWS (Apr 2022)
- **Certified ScrumMaster** — Scrum Alliance (Nov 2019)
- **Machine Learning** — Columbia University (Mar 2016)
- **Hadoop / Spark** — OpenClassrooms (Jul 2017)
- **Project Management** — MOOC (Oct 2014)
